

Goals of Regulation for the 21st Century

- To shape a high quality early care and education market that meets the needs of the families that utilize it and the needs of the children who are part of it.
- To shape a market from the ground up by creating a system that implicitly describes to providers what is expected and the consequences if those expectations are not met.
- To provide parents with easily understood data so they can make good early care and education choices on behalf of their children.
- To design a rater reliable system which includes a quality assurance component to insure the consistent application of licensing rules across the state.
