#PinwheelSelfie
Social Media Toolkit

Introduction

The Ohio Children's Trust Fund (OCTF) is promoting a statewide #PinwheelSelfie campaign for Child Abuse and Neglect Prevention Month in April. The campaign aims to raise awareness of child abuse and neglect prevention and to urge all Ohioans to take an active role in making their communities a better place for families and children. This Social Media Toolkit provides an overview of the #PinwheelSelfie social media campaign.

In addition to raising awareness for Child Abuse and Neglect Prevention Month, this campaign will raise awareness of the OCTF, which serves as the Ohio chapter of Prevent Child Abuse America.

Hashtag

The OCTF will use **#PinwheelSelfie** in social media messages during the month of April, reinforcing the connection with Child Abuse and Neglect Prevention Awareness Month. For collective impact, all local partners are encouraged to do the same.

Try to send or schedule at least one tweet with **#PinwheelSelfie** in it every day. Make sure the tweet is relevant to the hashtag. (For example, a tweet about child abuse prevention is relevant, but one about car seat safety is not.)

Twitter

The following schedule of tweets demonstrates the types of messages the OCTF anticipates posting during the 2016 campaign and provides samples for local adaptation and personalization.

WOULD YOU INVEST IN A LONG-TERM STRATEGY BACKED BY DECADES OF RESEARCH TO INCREASE YOUR BOTTOM LINE? Good, invest in child development. Here's why:

WHY do we care about child development?
Because when we create healthier environments for all children, we're promoting a healthier and more productive nation. When we invest in children now, we don't have to pay later, as individuals or society. But, this goal of a healthy and productive future is undermined by Adverse Childhood Experiences (ACEs).

WHY does this affect me?
ACEs not only lead to lifelong negative effects for the child who experiences them, but also creates a drain on businesses and taxpayers. Studies have shown that ACEs lead to:

- Higher health care costs
- Increased incarceration rates
- Lost work time
- Worsened health outcomes which impair the population's ability to be fiscally and emotionally prepared for work

The negative experiences children face early in life can create a population that is less able to work consistently and productively.

WHAT are Adverse Childhood Experiences?
Adverse Childhood Experiences (ACEs) from a teen's perspective include things like factors which may occur in the home under the age of 18, such as emotional, physical, or sexual abuse; loss of a parent through divorce, death or incarceration; experiencing hunger or being exposed to violence; that can contribute to lifelong physical and behavioral health outcomes. A child is more at risk for ACEs when the child's family experiences stressors like social isolation, unemployment, lack of health care, depression or the inability to access public resources.

The CDC estimates depression to cause **200 million lost workdays** each year at a cost to employers of **\$17 to \$44 billion**

Learn more about ACEs by visiting the Centers for Disease Control website at www.cdc.gov/ance/prevention/acestudy.

HOW can my business make a difference?

- Implement policies that help create healthier families and more productive employees such as flextime for employees, which helps reduce the stress of managing family schedules while still being active and productive employees.
- Use corporate sponsored events to inform employees about community services they can take advantage of that help create connections within the community. This can reduce the feeling of being alone or isolated and increase parental knowledge.
- Use the important community and public policy capital that you have to promote federal and state policies that promote healthy families while helping to improve the future climate for your business.
- Support funding for resources in your community that reduce parental stress such as pre- and post-natal programs or funding for home visiting programs.

Government plays an important role in the promotion of safe, stable, nurturing relationships and environments for families which are proven to help reduce ACEs, but so do businesses.

We can promote great childhoods for all children and a brighter future for families and our country. You can help.

Prevent Child Abuse America

Child Sexual Abuse Prevention Infographic from PCAA

ALL KIDS DESERVE GREAT CHILDHOODS BECAUSE OUR CHILDREN ARE OUR FUTURE.
One way each of us can help ensure this happy outcome is to learn what can be done to prevent the sexual abuse of children in our communities!

1 COMMUNITIES can support healthy sexuality and community awareness by:

- 1. Contacting local experts such as your public health department or national experts such as Prevent Child Abuse America to learn.
- 2. Encouraging your library to develop and promote a space called our community's safe, clean space, and parenting.
- 3. Setting and enforcing standards for public space that goods BMP social & supportive of children.
- 4. Limiting exposure to sexually explicit materials such as magazines and suggestive ads.

2 SCHOOLS AND YOUTH-SERVING ORGANIZATIONS can support a safe, healthy and respectful environment by:

- 1. Developing and enforcing safety policies:
 - Clear rules for staff or adults
 - Safe text policies
 - Clear communication
 - Safe behavior expectations
 - Procedures for reporting
- 2. Thoroughly screening all employees and volunteers w/it both a criminal background check and a person reference.
- 3. Providing specific training to new employees and volunteers that clearly explain organizational policies. Offer comprehensive guidelines that include how to deal with parents by using the 10-10-10 rule: 10 min respond to sexually inappropriate or predatory behavior; 10 min to let an adult.
- 4. Avoid putting the responsibility for sexual abuse prevention on only one individual.

3 PARENTS become comfortable talking to your children about all aspects of sexuality, including:

- 1. Your family's values about sex. It's usually not what parents think.
- 2. Respectful and safe boundaries on the sex of others.
- 3. Technology use and media exposure:
 - Parents who have been what they are doing in the past are more likely to have a positive relationship with their child.
 - Parents who have been what they are doing in the past are more likely to have a positive relationship with their child.
- 4. The relationship between privacy, being something by themselves, but you know about it, so they can talk to you.
- 5. The importance of consent, including that you can say no, and that you can say yes.
- 6. How young kids spend "alone time" with friends and family, even though they are not alone.
- 7. The fact of health care (13 years or older), encourage them to get tested.
- 8. The importance of being able to talk to a sexuality professional. If you don't know the answers, you can figure it out together.
