

# Take Time Tips

**Take Time** to remember how you wanted to be treated when you were a child.

**Take Time** to talk with your child about the good things they did today.

**Take Time** to ask how you can help your child do well in school.

**Take Time** to explain why a behavior is wrong & give your child time to think about other choices.

**Take Time** to really understand the message beneath the words your child is telling you.

**Take Time** to think about how you might sound to your child when you are talking to him/her.

**Take Time** to consider what your children will remember about you when they are grown.

**Take Time** to become a better parent. Parenting is a learned skill, just like driving a car, it takes education and practice.
