

## **Definition of Infrastructure:**

Infrastructure is defined as necessary supplies, one-time expenses, and serving necessities that are required to support the program supported by the Family Support Fund (FSF) grant. These items will directly be used to support the FSF program. Three quotes are needed for all equipment costs to ensure that the budget request is reasonable, customary and the best value. Infrastructure items that are deemed unacceptable by GOFBCI will not be reimbursed. If there are questions regarding a specific infrastructure costs, please ask a question during the RFGA Q & A session or ask the RFGA project manager if awarded the grant.

NOTE: Renting of space and services must be limited to the period of the contract.

### 1.Examples of Acceptable Infrastructure Costs

- \* Computers, laptops, scanner(s), printer(s)
- \* Computer supplies
- \* Internet (wireless and/or land line such as DSL)
- \* Computer software
- \* Strategic Planning
- \* Outcome and Results Management Assistance
- \* Office furniture and/or rent for space (in-kind space preferred)

### 2.Examples of Unacceptable Infrastructure Costs

- \* Purchase or rental of cars, trucks, buses
- \* Capital improvements (such as floor and tile repair, plumbing, etc.)
