Child Support Enforcement Report

January 1, 2011 through June 30, 2011

Child Support Enforcement Report

Federal requirements mandate that Child Support Enforcement Agency (CSEA) IV-D program performance measures are to be reported in the areas of:

- Establishment of Paternity
- Establishment of Support Orders
- Collection of Current Support
- Collection of Past Due Support

Performance Measurements

The attached report details Ohio counties' performance for the period of January 2011 through June 2011.

Paternity Establishment: Performance is measured using the IV-D paternity establishment percentage (IV-D PEP). This is calculated by dividing the number of children in IV-D cases born out of wedlock whose paternity has been established or acknowledged during the performance year, by the total number of children born out of wedlock in open IV-D cases at the end of the previous performance year. The IV-D PEP measurement is reflected in this report at both the county and the statewide level.

Support Establishment: Calculated by dividing the number of open IV-D cases with support orders established at the end of the reporting period, by the total number of open IV-D cases at the end of the period.

Collections on Current Support: Calculated by dividing the amount of current support distributed in IV-D cases during the fiscal year by the total amount of current support due in IV-D cases for the fiscal year.

Collections on Arrears: Calculated by dividing the number of IV-D cases paying toward arrearages during the reporting period by the total number of IV-D cases with arrears due during the reporting period.
