Alphabetical Cross-Reference of Technologists	34
Alphabetical List of Rehabilitation Technology Service Providers	36

Format

This directory lists the rehabilitation technology/engineering service providers according to the type of service provided (e.g., computer access, home modification). The company name, technologist name(s), categories of service provided (e.g., evaluation, recommendation, training), geographical area served and phone number are shown under each type of service. Detailed address information for each provider is listed alphabetically at the end of this directory, along with an alphabetical cross-reference of rehabilitation technologists.

Purpose

The Ohio Rehabilitation Services Commission (ORSC) compiles this list of facilities and individuals who provide technology-related consultative/evaluative services for persons with disabilities who are consumers of ORSC. This list is provided as a convenience to the ORSC counseling staff. It is not an endorsement of those listed within, nor is it meant to exclude anyone not listed within from providing such services.

Please note: All parties listed in this directory have submitted their credentials and have acknowledged agency assurances. These are on file with RSC's Rehabilitation Technology Support Unit. Rehabilitation technology service providers not listed should be encouraged to contact the Rehab. Tech. Support Unit at 1-800-282-4536, ext. 1470 to obtain the forms necessary to be included in the next update of this directory.
