

Establish an engaged Strengthening Families Ohio State Leadership team.

So that

Ohio families, early childhood, child welfare and social service organizations that support families and children are aware of and involved in Ohio's Strengthening Families efforts.

So that

Partnerships will be forged with potential stakeholders to ensure all systems and organizations are engaged.

So that

Gaps and opportunities for the implementation of the Strengthening Families Protective Factors will be identified.

So that

Strengthening Families will be integrated into state policy and planning.

So that

There is increased strength (through comprehensive systems engagement) and sustainability of state Strengthening Families efforts.

So that

There is transformational systemic change in the fields of child abuse prevention, early childhood, child welfare and other systems.
