Implementation Science: Stage-Based Implementation Conceptual Framework

Implementation Component
- Exploration
  - Form team; develop ways of work and communication protocol
- Installation
  - Develop team competencies; assure resources to support innovation
- Initial Implementation
  - Troubleshoot and problem-solve; use data at each team meeting to promote improvement
- Full Implementation
  - Use improvement cycles; develop and test enhancements

Implementation teams
- Data and feedback loops
  - Conduct needs assessment; determine fit and feasibility of approach; assess staff readiness
  - Assess infrastructure gaps; institute policy practice feedback loops; assess team competencies
  - Assess usability testing data to stabilize approach; track and improve fidelity scores
  - Assess outcomes; collect data to support fidelity monitoring and improvement
- Implementation infrastructure
  - Identify necessary infrastructure elements to support practice, organizational, and system change
  - Develop necessary infrastructure elements to support practice, organizational, and system change
  - Improve necessary infrastructure elements to support practice, organizational, and system change
  - Maintain skillful practice; produce more efficient and/or effective infrastructure to support outcomes
