OWCMS: Employer Services

The majority of options under the Employer menu in OWCMS became obsolete a few years ago. The menu options became obsolete when Job Match was decommissioned. However, the Employer Services screen has been updated and modified in order to effectively track employer services provided.

Accessing the Employer Services Screen

After successfully logging into OWCMS and selecting your LE office, select the Employer Search/Services option from the Employer hover menu.

Employer Search Screen

The Employer Search screen displays. A search for an employer must be performed and then selected in order to add an employer service. The search can be performed on the following fields:

- Employer Name
- FEIN

If an employer is entered in the system and matches your search criteria, the results will be displayed as you type. The list of employers are compiled from the Ohio Business Gateway and OhioMeansJobs. Once the desired employer is located, click on the employer record from the drop-down search results.

Note: Reference *Appendix A: Entering a New Employer* if the desired employer cannot be initially located in search.

Select Employer

The record selected displays on the Employer Search screen with additional location information is available.

Employer services are going to be tracked by employer location in order to distinguish the services provided to large corporations with multiple locations. Therefore, you must select a location prior to adding an Employer Service.

If the desired location is not listed or if no employer locations are listed, you have the ability to add a new employer location. Click the Add Employer Location button on the Employer Search screen.
