## ARIES Project Video Available

Last week, the Advancement through Resources, Information & Employment Services (ARIES) project team posted the second of four videos from Sprint Demo #3. This week's video follows last week's update on Trade Adjustment Assistance (TAA) and spotlights Trade Waivers. This demonstration has been posted on the [ARIES Videos website](#) and introduces users to training waivers, appeals determination, the review of multiple waivers and the revocation process. As always, please note that the video provides an update on the program/topic functionality. Additional functionality will be developed and shared as stories (use cases) are completed.

## ARIES System Project Update Meeting

Last week we announced that we streamlined the ARIES project update meeting registration process and sending invitations directly to our stakeholders. If partners are interested in attending future project update meetings starting January 28, please email [CMAdmin@jfs.ohio.gov](mailto:CMAdmin@jfs.ohio.gov).

As always, your feedback is critical to the ARIES project. After viewing the videos, please log your comments, questions and suggestions in the downloadable spreadsheet and email it to us at [CMAdmin@jfs.ohio.gov](mailto:CMAdmin@jfs.ohio.gov). If you need help logging in to the website, the [ARIES Videos Help Guide](#) contains instructions regarding how to register and navigate within the website.
